

The project is set during sunrise, a 3D shaped car moves right and left with the keyboard left and write arrow keys in a forest. To implement the project, first the car is divided into two parts. The top part which is a trapezoidal prism and the bottom half which is a rectangular prism. Then 4 tori are drawn to create the wheels of the car. Next, the forest trees and made by drawing a cylinder for the log and a green-colored cone for the leaves. The sun is done by creating a sphere while the clouds are three spheres joined together. Lastly, the street is a large solid cube.
